

Data Centre Services

Leading Insurance Services Provider

Delivery of structured cabling services into three data centres. Over the last two years ITM Communications has provided the following services:

- Installation, termination and testing 3000 intersite links spanning 8km for a business continuity solution
- Design, installation and testing 50,000 fibre terminations and 9,000 copper points to support mainframe, midrange and distributed systems environments
- Patch, installations moves, adds and changes (IMAC) service
- Set up, management and handover of their Aperture Vista Data Centre Management System.

Client: Leading Insurance Services Provider
System: Panduit
Duration: 5 Years
Value: £2 Million

Challenges:

Providing data centre services within three data centres to aggressive delivery programmes.
