

Campus Network

Global Outsource Business

The design and installation of a 2-phase structured cabling campus environment. Phase I encompassed 4,000 copper points, 5,000 fibres and campus links into 5 equipment rooms across two new buildings.

Having successfully completed phase I to a stringent programme and within budget, we have recently been awarded phase 2, comprising a similar scope of works.

“It is a testament to the dedication and professionalism of your staff that they just mucked in and got on with delivering what was required.

All are welcome back on this site for phase two.”
Rob Smith

Client: Marriott Construction (Kier)
System: Panduit
Duration: 20 Weeks (Phase I)
Value: £1.1 Million
