

What problems can I solve?

Power

- How much power does this server **consume**?
- How much power does this rack **have left**?
- If I change to this model, will I **save** any power?
- What would be the **impact** of a UPS **failure**?

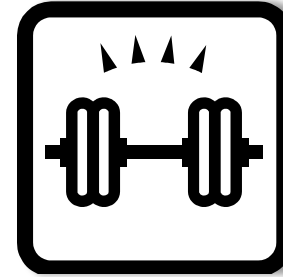

Space

- How much space do I have in these 3 **Racks**?
- How much space will the **new switches** take?
- If we virtualise, how much space **could we get back**?

Heat / Cooling

- How much heat will this server **generate**?
- Where are the **hot spots** in my computer room?
- Can I **turn off** the CRAC unit in this part of the Data Center?

Weight

- Will this rack be able to take this new **Blade System**?
- **How heavy** will this new server be?
- If we add large Core switches, will the upstairs computer room **be able to cope** with them?

Connectivity

- **Which switches** is this servers network ports connected to?
- Do I have **sufficient Power Sockets** for the new Blade Chassis?
- Do I have **any spare connections** in my other computer room?
